

# THE ENVIRONMENTAL TECHNOLOGIES FUND

Sustainable Venture Capital | Authentic European Leadership

## Measuring Impact: A journey towards a common language

Join the Managing Partner and Founder of ETF Partners in conversation with their Head of Sustainability, talking all things we've learned about impact over the last 15 years – the good, the bad, and the ugly. Why do we need to measure and how do we do it? Is CO2 the be-all and end-all? Where is ESG in all this? And – let's be honest – is this all just mealy-mouthed marketing, with no real substance behind it?

ETF Partners is Europe's leading sustainability venture capital and early growth fund. Founded in 2006 as the Environmental Technologies Fund, we demonstrate that technological innovation offers compelling answers to one of the most pressing problems of the world, achieving sustainability through innovation.
